

Creating a World Where Disability is a Strength

Korea Foundation
for Persons with Disabilities

The CI embodies the image of **two people** leaning on each other on the blue earth and sea. It symbolizes the advance to a better society through the solidarity and harmony of people with disabilities and non-disabled people. This integrates our values: **person-centeredness, communication, sharing, and solidarity**, meaning that we can progress toward a better society by supporting each other “such as when our Korean ancestors helped each other by Pumasi(exchange of services) and Durae(cooperation) in traditional agriculture.”

The BI represents hope towards a society **that respects the diversity and uniqueness** of disability, like the way a herb has its own shape, fragrance, and effect. When a herb spreads its gentle fragrance, it gives joy to many people; likewise, the BI carries the meaning to deliver happiness to the public services for people with disabilities through spreading the fragrance of sharing.
